Dear Parents and Caregivers,

We wish you all a very safe and relaxing holiday break. Good luck to our students who are involved in community and sporting activities over the holidays.

Oval Upgrade

As you can see the oval upgrade has been in full swing over the past 8 months and the feedback from the community and students using the oval is very positive. Some further work is required and is scheduled for later this year. This will also provide the school opportunities to establish partnerships with a range of community organisations and sporting clubs.

Pupil Free Day - Term 4 (Prior Notice)

Our next School Closure Day is coming up on Friday 14th November 2014 (Friday Week 5, Term 4), following our Sports Day. This is a school holiday approved by the School’s Governing Council.

Our approved Pupil Free Day will then be held on Monday 17th November 2014 (Monday Week 6, Term 4) which will be our Annual Review Day. All staff are heavily involved in this day as we set our learning targets for 2015 and beyond.

Keep safe and restful during these holidays.

Kind Regards
Dan Jarrad - School Principal

School Returns on Monday 13th October 2015
Classroom’s are open from 8:35am in the morning
Reminder– hats need to be worn from first day back in Term 4

Parent Feedback Form

We value feedback from our Parents and Caregivers. Please provide us with some positive/constructive feedback for the school.

Family Name..................................................................................................................................................Child’s Class Teacher.................................................................................................................................
........................................................................................................................................................................

2014

Elizabeth Grove Primary School
Here is an example of planning for children to use a variety of different items of interest at one table to create and problem solve – blocks, coloured shapes, pebbles, rice and different shaped containers. They were measuring, pouring, making breakfast, experimenting with quantity and learning how to clean up.

Above the children built a rocket ship from a range of items randomly put on a table to promote creativity. On the top are the buttons to operate the rocket ship and these are made from river stones.

Here children were experimenting with rice using different shaped containers. They were measuring, pouring, making breakfast, experimenting with quantity and learning how to clean up.

SOUTH AUSTRALIAN GRASSROOTS CHALLENGE 2014

Room 12 students were involved in an online Maths programme called MANGAHIGH challenging other South Australian Schools on a range of mathematical problems. Everyone was involved, however, there were a few outstanding students that gave their time at school and at home. Their participation helped Elizabeth Grove Primary School get across the line to win the Challenge.

Through the effort of Room 12, they won a $1,000 voucher to put towards the cost of continuing Mangahigh for 3 classes in 2015.

They have also won challenges by other schools which means they retain the trophy and have Term 4 free.

Amazing attempt by everyone!!!! Congratulations to all involved.
The top 10 students each received a medal, a certificate and a movie ticket for their effort.

OPAL Power Presentation at Elizabeth Grove on Thursday 21st August.

Students learnt the importance of having enough exercise, eating healthy and getting enough rest to have a healthy body.

Sand Pit Yard Play

We love playing in our sand pit! But we are running out of toys!

If you have any toys pots, pans or cookware suitable for our sandpit play and you would like to donate them to our school please bring them along and come and see Miss V. in the gym.

We ask the toys are in good condition. “We make a life by what we give, not by what we get”.

Thank you ☺
